Model 25951 Series 5.8 GHz Cordless Handset Speakerphone Answering System User's Guide

Your new GE telephone system is EXPANDABLE up to a total of 4 handsets (by purchase of optional Model 25901 handset with charge cradle)

Your telephone equipment is approved for connection to the Public Switched Telephone Network and

Equipment Approval Information

is in compliance with parts 15 and 68. FCC Rules and Regulations and the Technical Requirements for Telephone Terminal Equipment published by ACTA

1 Notification to the Local Telephone Company

On the bottom of this equipment is a label indicating, among other information, the US number and Ringer Equivalence Number (REN) for the equipment. You must, upon request, provide this information to your telephone company

still have all of these devices ring when your telephone number is called. In most (but not all) areas the sum of the RENs of all devices connected to one line should not exceed 5. To be certain of the number of devices you may connect to your line as determined by the REN, you should contact your local telephone company.

The REN is useful in determining the number of devices you may connect to your telephone line and

A plug and jack used to connect this equipment to the premises wiring and telephone network mus comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

• This equipment may not be used on coin service provided by the telephone company • Party lines are subject to state tariffs, and therefore, you may not be able to use your own telephone

equipment if you are on a party line. Check with your local telephone company. Notice must be given to the telephone company upon permanent disconnection of your telephone

from your line. • If your home has specially wired glarm equipment connected to the telephone line, ensure the

installation of this product does not disable your alarm equipment. If you have questions about what will disable alarm equipment, consult your telephone company or a qualified installer. US Number is located on the cabinet bottom.

REN Number is located on the cabinet bottom.

2 Rights of the Telephone Company Should your equipment cause trouble on your line which may harm the telephone network, the

telephone company shall, where practicable, notify you that temporary discontinuance of service may be required. Where prior notice is not practicable and the circumstances warrant such action, the telephone company may temporarily discontinue service immediately. In case of such temporary discontinuance, the telephone company must: (1) promptly notify you of such temporary discontinuance; (2) afford you the opportunity to correct the situation; and (3) inform you of your right to bring a complaint to the Commission pursuant to procedures set forth in Subpart E of Part 68, FCC

The telephone company may make changes in its communications facilities, equipment, operations or procedures where such action is required in the operation of its business and not inconsistent wit FCC Rules and Regulations. If these changes are expected to affect the use or performance of your telephone equipment, the telephone company must give you adequate notice, in writing to allow you to maintain uninterrupted service

Interference Information

device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions (1) This device may not cause harmful interference; and (2) This device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference • Regrient or relocate the receiving antenna (that is, the antenna for radio or television that is

- "receiving" the interference).
- Reorient or relocate and increase the separation between the telecommunications equipment and
- receiving antenna. Connect the telecommunications equipment into an outlet on a circuit different from that to which the receiving antenna is connected.

If these measures do not eliminate the interference, please consult your dealer or an experienced radio television technician for additional suggestions. Also, the Federal Communications Commission has prepared a helpful booklet, "How To Identify and Resolve Radio/TV Interference Problems." This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402. Please specify stock number 004-000-00345-4 when ordering copie

Hearing Aid Compatibility (HAC) s telephone system meets FCC standards for Hearing Aid Compatibi

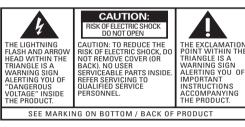

Licensing

FCC RF Radiation Exposure Statement

s equipment complies with FCC RF radiation exposure limits set forth for an uncontrolled envi his equipment should be installed and operated with a minimum distance of 20 centimeters between the radiator and your body. This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

For body worn operation, this phone has been tested and meets the FCC RF exposure auidelines when used with the belt clip supplied with this product. Use of other accessories may not ensure compliance vith FCC RF exposure guidelines

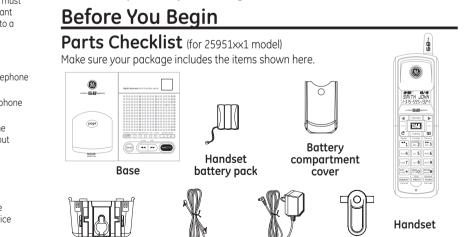

WARNING: TO PREVENT FIRE OR FLECTRICAL SHOCK HAZARD, DO NOT **EXPOSETHIS** OR MOISTURE.

Introduction

CAUTION: When using telephone equipment, there are basic safety instructions that should always be followed. Refer to the IMPORTANT SAFETY INSTRUCTIONS provided with this product and save them for future reference.

IMPORTANT: Because cordless phones operate on electricity, you should have at least one phone in your home that isn't cordless, in case the power in your home goes out.

For Model 25951xx2 there will be ONE additional handset, charge cradle, belt clip, battery pack and cover than shown above.

AC power

adaptor

For Model 5951xx3 there will be TWO additional handsets, charge cradles, belt clips, battery packs and covers than shown above.

Telephone Jack Requirements

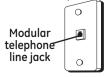

ATLINKS USA, Inc. To use this phone you need an RII1C type modular telephone. 10330 North Meridian Street Indianapolis IN 46290 © 2006 ATLINKS USA Inc. Trademark(s) ® Reaistered Marca(s) Registrada(s)

unauthorized access, and charges to your phone line.

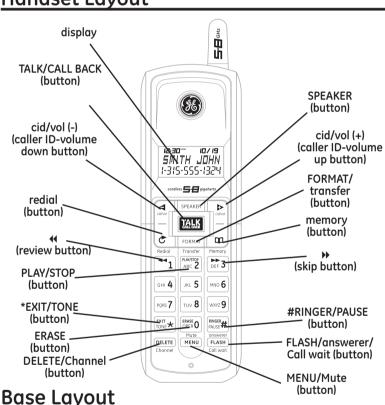

INSTALLATION NOTE: Some cordless telephones operate at frequencies that may cause or receive interference with nearby TVs, microwave ovens, and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV, microwave ovens, or VCR. If such interference continues, move the cordless telephone farther away from these appliances.

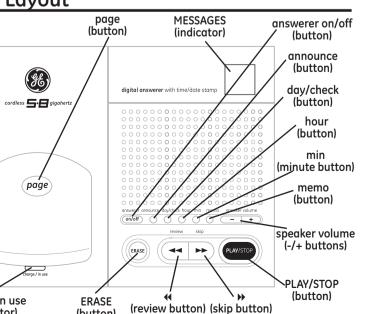

Certain other communications devices may also use the 5.8 GHz frequency for communication, and, if not properly set, these devices may interfere with each other and/or your new telephone If you are concerned with interference, please refer to the owner's manual for these devices on how to properly set channels to avoid interference. Typical devices that may use the 5.8 GHz frequency for communication include wireless audio/video senders, wireless computer networks, multi-handset cordless telephone systems, and some long-range cordless telephone systems.

Important Installation Guidelines

- Avoid sources of noise and heat, such as motors, fluorescent lighting, microwave ovens, heating appliances and direct sunlight.
- Avoid areas of excessive dust, moisture and low temperature Avoid other cordless telephones or personal computers.
- Never install telephone wiring during a lightning storm.
- Never install telephone jacks in wet locations unless the jack is specifically
- designed for wet locations.
- Never touch non-insulated telephone wires or terminals, unless the telephone line has been disconnected at the network interface.
- Use caution when installing or modifying telephone lines.

Handset Layout

Installing the Phone

Installing the Handset Battery

our cordless phone uses a digital security system to protect against false ringing,

CAUTION: To reduce the risk of fire or personal injury, use only the ATLINKS USA, Inc. Nickel-Cadmium battery model 5-2548, which is compatible with this unit.

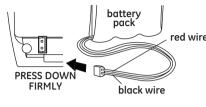

1. Locate battery and battery door which are packaged together inside a plastic bag and are separate from the handset.

2. Locate the battery compartment on the back of the handset.

NOTE: You must connect the handset battery before use.

3. Plug the battery pack cord into the jack inside the compartment. PLEASE REGISTER shows in the display

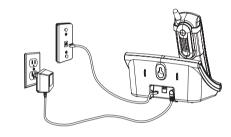

NOTE: To ensure proper battery installation, the connector is keyed and can be inserted only one way

- 4. Insert the battery pack
- 5. Close the battery compartment by pushing the door up until it snaps into place

Base Station

1. Choose an area near an electrical outlet and a telephone wall jack (RJ11C), and place your cordless telephone on a level surface, such as a desktop or tabletop, or you may mount it on the wall.

- 2. Plug one end of the telephone line cord into the TEL LINE jack on the bottom of the base and the other end into a modular jack.
- 3. Plug the AC power converter into the electrical outlet and the DC connector into the jack on the bottom of the base.
- 4. Place the handset in the base cradle. The charge/in use indicator turns on, verifying the battery is charging. The unit will take 20 seconds to register and verify its security code. READY shows in the display
- 5. Allow the phone to charge for 16 hours prior to first use. If you don't properly charge the phone, battery performance is compromised

Wall Mounting 1 Turn the base over

- 2. Attach the wall mounting pedestal by first inserting the tabs on the open edge of the pedestal into the slots on the lower portion of the bottom of the base. Then push down and snap the pedestal into place.
- 3. Slip the mounting holes (on the back of the base) over the wall plate posts, and slide the unit down into place. (Wall plate not included.) NOTE: If desired, gather the extra telephone line and power adaptor

cord and store inside the wall mounting pedestal. Answering System Setup

This section shows you how to set up your answering system to receive incoming calls. Before you begin the set up process, you must turn on the answering system.

• Press the answerer on/off button to turn the answering system on and off. The MESSAGES indicator lights when the answering system is on. The indicator blinks when you have new messages.

NOTE: The answering system displays "- -" when it is off.

Setting the Voice Prompt Language The default voice prompt language is English

To change the answering system's voice prompt language, press and hold the skip button for two seconds. The unit announces "SELECCIONADO ESPANOL" (Spanish

NOTE: To change to English, press and hold the skip button again for 2 seconds. The unit announces "ENGLISH SELECTED". NOTE: In remote access mode, the system follows the selected

language. The voice prompt language cannot be switched remotely.

- 1. Make sure the phone is **ON** by pressing the TALK/CALL BACK button.
- 2. Press the Memory button. 3. Press the memory location (0-9). The number dials automatically.

1. Make sure the phone is **OFF** (not in TALK mode).

- 2 Press the Memory button 3. Use the touch-tone pad or the cid/vol(-or+) button to scroll to the number you
- 4. Press the TALK/CALL BACK or SPEAKER button. The number dials automatically.

Chain Dialing from Memory

Use this feature to make calls which require a sequence of numbers, such as calling card calls to a frequently called long distance number. Each part of the sequence is dialed from memory. The following example shows you how to use chain dialing to make a call through a long distance service:

ation	Sc
	Use
	1.4.4

Memory Loc

- When the answering system picks up: 1. Press the FLASH/answerer/Call wait button to access the answering system.

- 2. Listen as the caller leaves a message.
- 3. Press the TALK/CALL BACK button to speak to the person or press the FLASH/ answerer/Call wait button to stop screening the call

When answering system memory is full, the system answers after 10 rings, beeps and waits for you to enter the 3-digit security code. If you don't enter the security code within 10 seconds, the phone hangs up.

- You should erase some messages so the answering system can record new ones.
- NOTE: The unit also answers after the 10th ring if it is turned off. To access the answering system, enter your 3-digit security code after

Accessing the Answering System from Another Location

- You can access your answering system from any touch-tone phone by entering your 3-digit security code after you hear the outgoing announcement
- 1. Dial the telephone number to which the answering system is connected to. 2. Enter the security code after you hear the tone.
- 3. Follow the voice menu to use the answering system's remote functions.
- The remote feature lets you perform the following functions

То	Press this Button
Review message	1
Play back messages	2
Stop message playback	2
Erase message	0 (during message playback)
Skip message	3
Turn off/on answerer	4
Review voice menu options	7

TIP: You can bypass the outgoing announcement by pressing any numbered key on the touch-tone pad while the announcement is playing. Then, you can enter your security code to access the answering system.

Headset and Belt Clip Operation

1. Remove the rubber cap covering the headset jack.

disabled when the headset is connected

Attaching the Belt Clip

handset. Snap the ends of the belt clip into place.

Changing the Battery

1. Remove the battery compartment door.

4. Put the battery compartment door back on.

which is compatible with this unit.

Connecting an Optional Headset to the Handset

2. Connect the headset to the headset jack on the handset. The handset receiver is

the microphone to approximately two to three inches from your mouth.

5. To return to normal operation, unplug the headset from the jack.

3. Adjust the headset to rest comfortably on top of your head and over your ear. Move

4. Press the TALK/CALL BACK button on the handset to answer a call or make calls with

Handset Sound Sianals

Signal	Meaning	
A long warbling tone (with ringer on)	Signals an incoming call	
Three short beeps (several times)	Page signal	
One beep every 7 seconds	Low battery warning	

Troubleshooting Tips Caller ID Solutions

- Fully charge (for 16 hours) or replace the battery.
- If you are using AC (electrical) power, make sure that the unit is connected to a non-switched electrical outlet. Unplug the AC power converter from the unit and plug it back in
- To see Caller ID information in your display, you must be subscribed to Caller ID service through your local telephone company.

Caller ID incomplete

• The unit displays this message if it detects anything other than valid Caller ID information during the silent period after the first ring. This message indicates the presence of noise on the line.

Telephone Solutions Handset can not link

• If any handsets become inoperable, place it on the main base cradle for 20 seconds to re-register

- Check or repeat installation steps
- Make sure the base power cord is connected to a working electrical outlet. • Make sure the telephone line cord is connected to the base unit and the modular
- phone jack? • Disconnect the base from the wall phone jack and connect another phone to the
- same jack. If there is no dial tone on the second phone, the problem might be your wiring or local service.
- The handset might be out of range of the base. Move closer to the base.
- Make sure the battery is properly charged (for 16 hours). • Ensure the battery pack is installed correctly
- Did the handset beep when you pressed the TALK/CALL BACK button? Did the in use indicator come on? The battery may need to be charaed.

- Make sure the ringer is set to ON, this can be done through the handset setup menu Ringer Volume
- You may have too many extension phones on your line. Try unplugging some phones.
- See solutions for "No dial tone."

ou experience static, noise, or fading in and out

- Change channels
- The handset may be out of range. Move closer to the base.
- Relocate the base. • Charge the battery.
- Make sure base is not plugged into an electrical outlet with another household appliance.
- Unit beeps • Place handset in base cradle for 20 seconds to reset the security code. If that

doesn't work, charge the battery for 16 hours. See solutions for "No dial tone."

- Replace the battery
- Memory dialing Make sure you correctly program the memory location keys.
- Make sure you follow the proper dialing sequence.
- You may need to reprogram numbers into memory after a power outage or

Out of range

- Move closer to the base
- Reset the battery. Unplug the battery and plug it in again after five seconds. • Reset the power supply. Unplug the supply and plug it in again after five seconds

Phone with tone service dials out in pulse mode • Make sure phone is in tone dialing mode.

- Phone won't dial out with pulse service Make sure phone is in pulse dialing mode. Handset displays UNAVAILABLE
- Place the handset on the main base for reset. An additional handset is in use.

Move closer to the base.

Set the time clock.

Answers on 10th ring Make sure answering system is turned on

• Answering system memory may be full. Erase some messages

Answering System Solutions

- Incoming messages are incomplete
- An extension phone may have been lifted as a message is received.

Answering system memory is full. Erase some messages.

• You may have accidently pressed the PLAY/STOP button during playback and stopped the message

You must use a tone-dial phone. This phone does not support pulse (rotary) dialing.

- Won't respond to remote commands
- 11721 B Alameda Ave. Make sure to enter the correct security code Socorro, Texas 79927 • Did unit hang up? If you take no action for a period of time, it automatically hangs

Causes of Poor Reception

- Aluminum sidina. • Foil backing on insulation.
- Heating ducts and other metal construction can shield radio signals.
- You're too close to appliances such as microwaves, stoves, computers, etc.
- Atmospheric conditions, such as strong storms • Base is installed in the basement or lower floor of the house.
- Base is plugged into an AC outlet with other electronic devices. • Baby monitor is using the same frequency.
- Handset battery is low.
- You're out of range of the base

General Product Care o keep your telephone working and looking good, follow these guidelines:

- Avoid putting the phone near heating appliances and devices that generate electrical noise (for example, motors or fluorescent lamps).
- DO NOT expose to direct sunlight or moisture • Avoid dropping and other rough treatment to the phone.
- Clean with a soft cloth • Never use a strong cleaning agent or abrasive powder because this will damage

• Retain the original packaging in case you need to ship the phone at a later date
